

# DashDrive Air AE400 Quick Start Guide

## Charging the AE400:

Connect a micro USB cable to the micro USB port, and connect the other end to a computer or USB wall socket charger. Before first use, charge the AE400 for eight hours.

- Power/Charge display light
- Wireless signal indicator
- Power bank indicator
- Power switch
- USB / card reader indicator

Select function modes (described below) by short presses of the power switch. A long press turns the power on/off.

**Setting up:** Go to the Apple App Store or the Google Play site, then download and install the free software- **DashDrive Air Elite**.

**Wireless signal indicator status:**  
 Continuous green - Wireless function active  
 Flashing green - Wireless function active, and in use (data is being transferred)  
 Continuous blue light - Wireless function active, and wireless hotspot created

**Getting started with desktop or laptop:** Connect the SD card or USB storage (FAT32 or exFAT only) to the AE400. Go to the network settings in your operating system and find ADATA\_AE400\_XXX. Security key is 12345678. Select the networked drive to transfer data.

**Getting started with phone or tablet:** Connect the SD card or USB storage (FAT32 or exFAT only) to the AE400. Open network settings on your device and find ADATA\_AE400\_XXX. Security key is 12345678. Run the DashDrive Air Elite app.

**Create a wireless hotspot with desktop or laptop:** Connect to the AE400 with your computer. Open a web browser and enter the URL as: 192.168.99.1

**Create a wireless hotspot with mobile device:** Connect the AE400 to your mobile device. Open the DashDrive Air Elite app and go to the settings page.

Enter your user name and password (default values are "admin"). Click the "Internet Access" option, and select the desired network hotspot. This will share the internet access with multiple users.

**Using the AE400 as Power Bank:** Short press the power switch until the power bank indicator turns green. Use a USB cable to connect the mobile device to the AE400.

**Note:** The AE400 does not support simultaneous reading of multiple devices. When switching device to be read, first remove the original storage device and then insert/connect the new device that you want to access.
