

# TOUGH CAPACITY FOR GAMING CHALLENGES

## SD700X External Enclosure

The XPG SD700X is the first gaming-styled IP68 external SSD designed to expand console storage. It's completely dust-tight and highly waterproof, delivering up to 1TB in plug n play for Xbox One and PS4. The SD700X reaches 440MB/s read and write – over 4X faster than internal Xbox One/PS4 HDDs.

### Big capacity mobilizes your library

Games keep getting bigger and console drives struggle to keep up. Available in 256GB, 512GB, and 1TB, the SD700X SSD frees you from the horrible need to choose which title to keep and which to delete.

### Don't wait – load games faster

We all know the frustration of sitting around waiting for games to load. SSD speeds accelerate load times by an average 20% compared to internal console drives – that's a big difference!

### IP68 certified & military-spec shockproof

The SD700X is IEC IP68 certified, easily surviving an hour of immersion in 1.5m deep water. Add total dust-tight protection and US Army MIL-STD-810G 516.6 drop/shock resistance.

### All-new 3D NAND helps advance gaming

The SD700X uses 3D TLC NAND Flash – more reliable and efficient than older 2D NAND and allows for bigger capacities without huge increases in cost to you. This is how SSDs finally make a big impact on games.
