

XPG ALPHA GAMING MOUSE

XPG ALPHA is an all-around gaming mouse offering a combination of high performance and gamer-tailored customization via XPG PRIME software. It's ergonomically designed for long lasting gaming session, and its PIXART PAW 3335 sensor offers up to 16,000 DPI and 400 IPS speed. And more for gamers to optimize when synchronized with XPG PRIME software.

AWARD-WINNING ERGONOMIC DESIGN for GAMING

Designed to offer the best user experience for gaming, the XPG ALPHA's ergonomic curve for the palm to rest upon, XPG's :Exoskeleton design language aims to synergize the strengths of both performance and function with aesthetics. As such, the XPG ALPHA design concept was recognized as a winner of 2022 Red Dot Design Award.

:EXOSKELETON DESIGN LANGUAGE

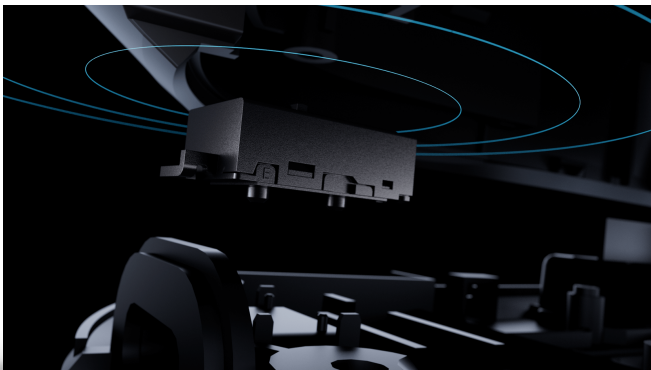

The first feature that clearly sets XPG ALPHA gaming mouse apart from the pack is the simple and elegant aesthetic curve line. Over the last few years, XPG has been investing in building its own industrial design language, called “:Exoskeleton” to focus on a balance between form and function, an ergonomically comfortable gaming experience and enjoyable sessions without foregoing a pleasant glance on your desktop.

PROGRAMMABLE via XPG PRIME SOFTWARE

The brand new XPG ALPHA is built to be carried with you often and for a long time to come. With the use of high quality OMRON switches, the XPG ALPHA boasts a switch MTBF of over 60 million clicks.

PREMIUM OMRON SWITCHES

XPG ALPHA is a software-programmable gaming mouse, offers buttons, DPI settings and lighting effects to be customized and tailored to gamer's needs to seamlessly switch between multiple computers.

HIGH PERFORMANCE PIXART PAW 3335 SENSOR

XPG ALPHA equips PIXART PAW 3335 sensor to deliver both high performance and high precision. Offers up to 6 preset DPI settings baked into the mouse that can be easily shuffled with the DPI button at the top of the mouse. The sensor supports DPI range from 100 to 16,000 (via XPG PRIME), ideal for MMORPG games to FPS shooting games.

FEATURES

- Right-handed, Ergonomic gaming design for all types of gaming grips
- High performance, low-power consumption sensor PAW-3335
- Premium OMRON switches
- Supports XPG PRIME Software
- Programmable Buttons, DPI, and Lighting Settings
